WINTER LAWN GRASS SEED

for Beautiful Southern Lawns

Lawn of Winter Grass

ITALIAN

RYE GRASS

AMERICAN GROWN

The winter grass for all the South. Superior to foreign grown Italian and English Rye Grass seed. Our fancy seed is heavier and more plump, full of vitality, quick to start and strong in growth. It is a fast-growing annual grass with long flat leaves, growing in tufts if left uncut. It is valuable to dairymen for winter and spring grazing, but its great use is for winter and spring lawns.

Scratch seed in Bermuda sod for green lawn until the Bermuda comes out again in summer. By itself it makes a delightful green lawn, in sun or shade, all fall, winter and spring. If stands repeated mowing on lawn or golf green. Sow 10 lbs. per 1,000 sq. ft. (50x20 ft.) for lawns; 50 lbs. per acre for pastures. **Prices: Lb. 45c; 5 lbs. $1.35, postpaid. Not prepaid—10 lbs. $1.45; 25 lbs. $3.60; 100 lbs. $11.50.**

INOCULATED

AUSTRIAN WINTER PEAS

DOUBLES YOUR

CORN and COTTON YIELDS

Rapidly climbing to the top as the leading soil-builde. and winter crop throughout the entire South, because of its large, heavy growth on practically all soils and its ability to resist winter freezes. Matures two weeks ahead of Vetch and makes a splendid temporary pasture in late winter. Furnishes grazing for your livestock, and decays rapidly when plowed under.

Sow Austrian Winter Peas during September and October, in drills, at the rate of 30 pounds per acre and cover 2 inches. May also be sown broadcast and disked in. Sowing the seed broadcast in cotton middles and straddling the rows with a two-horse cultivator with the disk hillers or plows is a very good method of covering. **Lb. 45c; 5 lbs. $1.15, postpaid. Not prepaid: 10 lbs. $1.05; 25 lbs. $2.35; 100 lbs. $7.45.**

HAIRY VETCH

An Outstanding and Reliable Soil Builder

Poor soil can soon be made rich with it. Planted combined with small grain, such as Oats and Rye or seeded alone makes splendid winter and spring pasturage. Stands severe winters without injury, grows on practically all types of soil. Vetch is usually turned under in early April. A good crop is equivalent to 250 pounds or more of Nitrate of Soda and valuable humus is put into the soil. Planted September to December, sow 20 to 25 pounds per acre alone, 15 pounds with small grain. Inoculate with NITRAGIN C. **Lb. 45c; 5 lbs. $1.60, postpaid. Not prepaid: 10 lbs. $2.30; 25 lbs. $5.20; 100 lbs. $19.75.**

COMMON VETCH

Common Vetch prefers sandy loam, well drained, but will produce a good crop on most any other soil where water does not stand. When planted alone it requires 30 to 40 lbs. to the acre, half that quantity is sufficient when sown with small grain. Seed should be inoculated with Nitragin. **Lb. 45c; 5 lbs. $1.35, postpaid. Not prepaid, 10 lbs. $1.75; 25 lbs. $3.95; 100 lbs. $14.50.**
